1. Introduction (First-level heading, Times New Roman 12pt, Bold)

Normal (regular) text of the paper, Times New Roman 10pt, Block-aligned. First paragraph of the section, lacking indentation at the beginning of the first line. Space of 6pt is below heading.

Second and following paragraphs of the text have no initial indentation as well. Normal text of the paper, Times New Roman 10pt. Space of 6pt is between (below) each paragraph.

1.1 Subsection (Second-level heading, Times New Roman 11pt, Bold, Italic)

The article must be entirely original, not previously published, and must not be under concurrent consideration or scheduled for presentation elsewhere.

Your paper will be part of the conference proceedings. Therefore we ask that authors follow the guidelines explained in this example. The article should be written in the Microsoft Word format (*.docx). Please note the changed style. Be advised that papers in a technically unsuitable form will be returned for retyping. After returned the manuscript must be appropriately modified.

Second and following paragraphs are not indented either, normal text of the paper, Times New Roman 10pt. Space of 6pt is below heading. Space of 6pt is between (below) each paragraph.

1.1.1 Subsection- optional (Third-level heading, Times New Roman 11pt, Italic)

Normal text of the paper, Times New Roman 10pt, Block-aligned. Again first paragraph is without indentation.

Second and following paragraphs are not indented either, normal text of the paper, Times New Roman 10pt. Space of 6pt is between (below) each paragraph.

2. Problem Formulation and Methodology

Normal text of the paper, Times New Roman 10pt, Block-aligned. Again first paragraph is without indentation.

Second and following paragraphs are not indented either, normal text of the paper, Times New Roman 10pt. Space of 6pt is between (below) each paragraph.

2.1 Model and Data

Mathematical equations must be numbered as follows: (1), (2), ..., (99) and not (1.1), (1.2),..., (2.1), (2.2),... depending on your various sections.

2.1.1 Model Calibration

Figures should be numbered as follows: Figure 1, Figure 2, etc. Tables should be numbered as follows: Table 1, Table 2, etc.

3. Problem Solution

Normal text of the paper, Times New Roman 10pt, Block-aligned. Again first paragraph is without indentation.

Second and following paragraphs are not indented either, normal text of the paper, Times New Roman 10pt. Space of 6pt is between (below) each paragraph.

4. Conclusion

Please, follow our instructions faithfully otherwise you have to resubmit your full paper. This will enable us to maintain uniformity in the conference proceedings.

If your paper deviates significantly from these specifications, Conference organization committee may not be able to include your paper in the Proceedings.

Appendix

If any, the appendix should appear directly after the references without numbering, and not on a new page.

Paper Format Guidelines

Tables and figures should be numbered and references to them must be in the text. Acceptable labelling for a table is Table 1 and Figure 1. The title of the table or figure is placed above left-aligned and the source below the table or figure left-aligned. The text should be composed in such a manner that there are not a greater number figures or tables on a single page. Tables and figures in landscape format are not acceptable.

Tables should be properly numbered, centred and should always have a caption positioned above it. The font size used in the tables is Times New Roman, 10pt, centred. *Tables must be in text format (not figure)*. Figures are centred in the paper as well. All figures will be processed as *images*. Figure resolution should be at least 300 dpi.

Colour of text and figures: the paper is only printed in *black-white colour*.

Do not draw charts, schemes and diagrams in Microsoft Word, use other more suitable program.

Equations and formulas are denoted by numbers in round parentheses and it is recommended to be produced by *Microsoft Equation Editor* or *MathType* add-on for equations in your paper (<http://www.mathype.com>).

$$\min_{\lambda} z_0 = \Theta_0 \quad (1)$$

$$\sum_{j=1}^n \lambda_j y_{r_j} \geq y_{r_0}, r = 1, 2, \dots, s \quad (2)$$

$$\Theta_0 x_{i_0} - \sum_{j=1}^n \lambda_j x_{i_j} \geq 0, i = 1, 2, \dots, n \quad (3)$$

$$\sum_{j=1}^n \lambda_j = 1 \quad (4)$$

$$\lambda_j \geq 0, \quad j = 1, 2, \dots, n \quad (5)$$

For separation of text-parts, you may use a **numbered list**, if necessary:

1. First component,
2. Second component,
3. Third component;

or a **multiple-choice list**:

- a. First option,
- b. Second option,
- c. Third option.

Reference Text and Citations

References and citations should follow the *Harvard* (Author, date) *system convention*. As example you may consider the citation (Smith, 1998) or (Young, 2010, p. 23) or (European Commission [online], 2016). Besides that, all references listed at the paper should be cited in the text. No numbers with or without brackets should be used to cite or to list the references.

For more instructions about the references and citations usage please see the appropriate link to Harvard System Convention on the web.

References and citations from the Web of Science and the Scopus are preferred to be used in larger scale in the paper. *We strongly require using at least 3 articles from Web of Science database and 1 article from Scopus database* (both including journal and conference proceedings citations). Citations from previous ICEI conference proceedings are required.
