Confidence isn’t just for public speaking. It’s an attitude that steers you through life. And if you weren’t born with it, you can always borrow it from the ŠKODA FABIA. With its sharp, angular lines it’s way too bold to be shy. But its confidence isn’t just locked in its looks. Being a thoroughbred ŠKODA means it comes with thoughtful Simply Clever details that add comfort to confidence.

The FABIA is yet another example of our philosophy of making beautifully designed cars that are as much a joy to drive now as they were back when we started.

That’s Simply Clever. That’s ŠKODA.

But most importantly, which can carry any motive you can think of. Thus, it perfectly reflects your style, temperament or hobbies. And when they change? You can peel the foil off in one fell swoop, and you can spice up your car again!

DON’T HAVE YOUR OWN IDEA AT THE MOMENT?
If you want to decorate the interior of your vehicle to your liking but don’t have a suitable picture, use the selection of ready themes. The pre-defined interior foils can also be ordered in the ŠKODA E-shop. You just need to decide, which one of the 10 black and white designs will be the right one for your car.

Holds and lasts

Did you know that the textile floor mats from ŠKODA Genuine Accessories also undergo the so-called ‘heel test’? This test simulates the action of the driver’s foot on the accelerator, sinking the heel 5 mm into the floor mat in both dry and wet conditions at an angle of 45°. The floor mats also undergo an additional load test in the form of a long driving test, and further focus is placed on the brackets fixing the front floor mats to the car upholstery. The tests are designed to verify the proper clip strength needed to enable comfortable handling by the driver, while keeping the floor mat in place despite the occasional application of force during the drive.

The smart solutions and practical little items are proof that the words “Simply Clever” are no empty marketing slogan. These are features that increase comfort and boost the car’s practicality. The thought our basic principle remains the same for everyone: to deliver a premium ride and pleasurable use of the car.
When you head off on holiday, or set off for a cycling track or a ski run, some things you need simply do not belong inside a car – even if they fit. So transport them on the roof or in a trailer.

The racks undergo a number of demanding tests. Their resistance to corrosion, loading capacity, strength and durability are tested in various conditions, as well as the subsequent water tightness of the car after their installation. During the so-called City Crash test, a rack loaded with 90 kg must remain on the car body under a force of approximately 12 G lasting for 50 milliseconds (impact simulation).
